## EBN Renewable Energy Basket

In today's rapidly evolving energy landscape, businesses across the UK face increasing pressure to adopt **sustainable solutions while managing costs effectively.**

Our innovative Renewable Energy Basket offers a **comprehensive, end-to-end energy service** that EBN members—from SMEs to large corporations—can join.

This exclusive EBN basket covers both **gas and electricity** meters, providing unique benefits such as **collective buying power**, access to **renewable energy** and **tailored energy solutions**.

# Sustainable Solutions

## Benefits of the Basket

By pooling energy demand, the basket leverages collective buying power to secure more favourable rates in the energy market. This reduces costs for all participants, making it a cost-effective solution.

Buying Power

Renewable Energy Access

End-to-End Energy Service

Buying  
Power

By pooling energy consumption, the basket leverages collective buying power to secure more favourable rates in the energy market. This reduces costs for all EBN participants making it a cost-effective solution.

- Lower energy prices through bulk purchasing.
- Reduce risk of market fluctuations.
- Simplified process.

# Sustainable Solutions

## Benefits of the Basket

### Renewable Energy Access

EBN members gain access to renewable energy sources, aligning with corporate sustainability targets and requirements.

- Reduce carbon emissions
- Enhanced corporate social responsibility (CRS) profile.
- Future proofed energy strategy.

### End-to-End Energy Service

Our basket solution includes comprehensive energy services from procurement to on-site energy efficiency measures.

- Energy procurement – Negotiating the best rates and terms for Electricity and Gas.
- Energy audits – Identifying opportunities to improve energy efficiency.

- On-site services – Including LED lighting upgrades, smart meter installations and ongoing maintenance.
- Sustainability reporting – Helping members track and report on their carbon reductions.

# Sustainable Solutions

## EBN Fund

Clients are **grouped** with **one** energy **supplier**.

### KEY FEATURES

Ability to **sell back** and unlock price, e.g., in a falling market.

**SELL**

The energy is executed by **Eden's Trading team**.

We look for **dips** and **buy volume** via a **hedging strategy**.

Re-forecast volume at **any time**.

We can buy **100%** and turn it back into a **Fixed contract**.

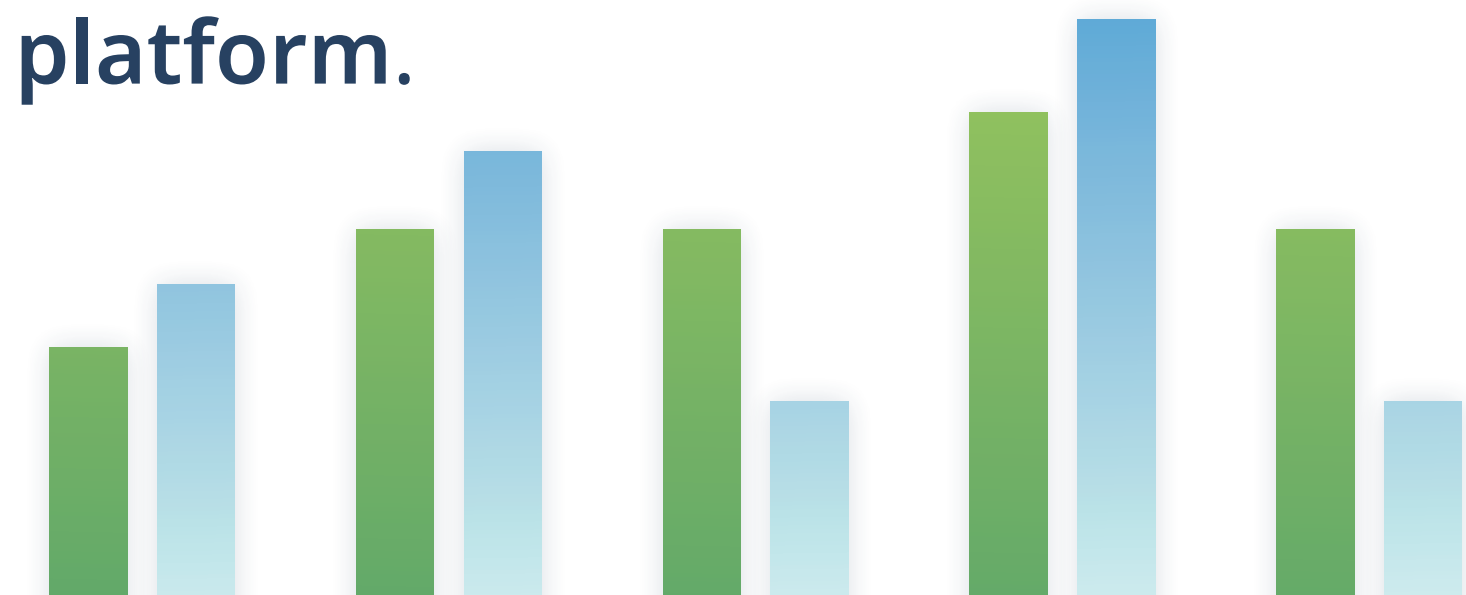

Option to buy **Full Green Energy** – 100% **REGO** Backed.

**Fixed** or **Pass Through** Non-Commodities charges.

### EDEN'S BUYING STRATEGY

- Eden's Trading team will conduct buying.
- Seasonal buying – Winter/Summer.
- The price will be 100% bought prior to season expiry.
- Performance reporting will be issued **weekly**.
- Fully Delivered Forecasting is available.
- Full Reporting accessed via Eden's online platform.

# Sustainable Solutions

## Renewable Options

### Certified Renewable Electricity

Certificates have been sourced from generators including biomass, wind and solar installations, helping to bring carbon-intensive energy sources off the grid whilst supporting smaller generators.

### RGGO (Renewable Gas Guarantees of Origin)

Green Gas certificates for specific client needs, helping to support the UK's bio-methane industry and reducing waste. The RGGO, not only tracks the volume of green gas produced, but also the method of generation and the date of injection, which can be shared for your carbon footprint reporting.

### Carbon Neutral Natural Gas

Certified Emission Reduction (CER) certificates equivalent to the volume of gas supplied, which means that the gas you consume is carbon neutral. Certificates are produced by projects that reduce emissions in developing countries.

# Sustainable Solutions

## How does it work?

### Enrolment

- EBN members sign up to join the basket, providing gas and electricity meter details.
- Join **any time** with a common end date.
- There is **no charge** to join the basket.

### Procurement Process

- Aggregate the consumption from **all members**.
- Collective energy buying to secure the **best rates**.

### Ongoing Management

- Continuous **monitoring** of energy **usage** and market **trends**.
- Market reports provided to all clients.
- The supplier will pay Eden directly for their service.

### On-Site Services

- Optional services include **energy audits**, **LED lighting upgrades** and **more**.
- Ensuring members **maximise their energy efficiency**.

# Sustainable Solutions

## EBN Fund

Eden Utilities have designed a product to **support our clients** along with **mitigating price risk from energy buying**.

The aim is to buy in a more strategic way to traditional fixed priced procurement. If you fix your price, you are **locking in 100% of the energy on one day out of 365 in the year**. This comes with a degree of risk and you are unable to amend the price once contracted.

The **Fund** is a **low-risk strategic alternative**. You will join similar sized clients together in an aggregated buying product.

Eden will buy the volume **strategically**, **little** and **often** at **market dips**.

### CORE BENEFITS

BUYING POWER

STRATEGIC BUYING

SMOOTHED PRICE

## Sustainable Solutions

# What is the EBN Sustainable Energy Basket?

The Sustainable Energy Basket is a collective procurement solution designed to exclusively help EBN members across the UK.

**Achieve cost savings** through combined purchasing

**Access renewable energy** to meet sustainability goals

**Energy management** with an end-to-end service offering

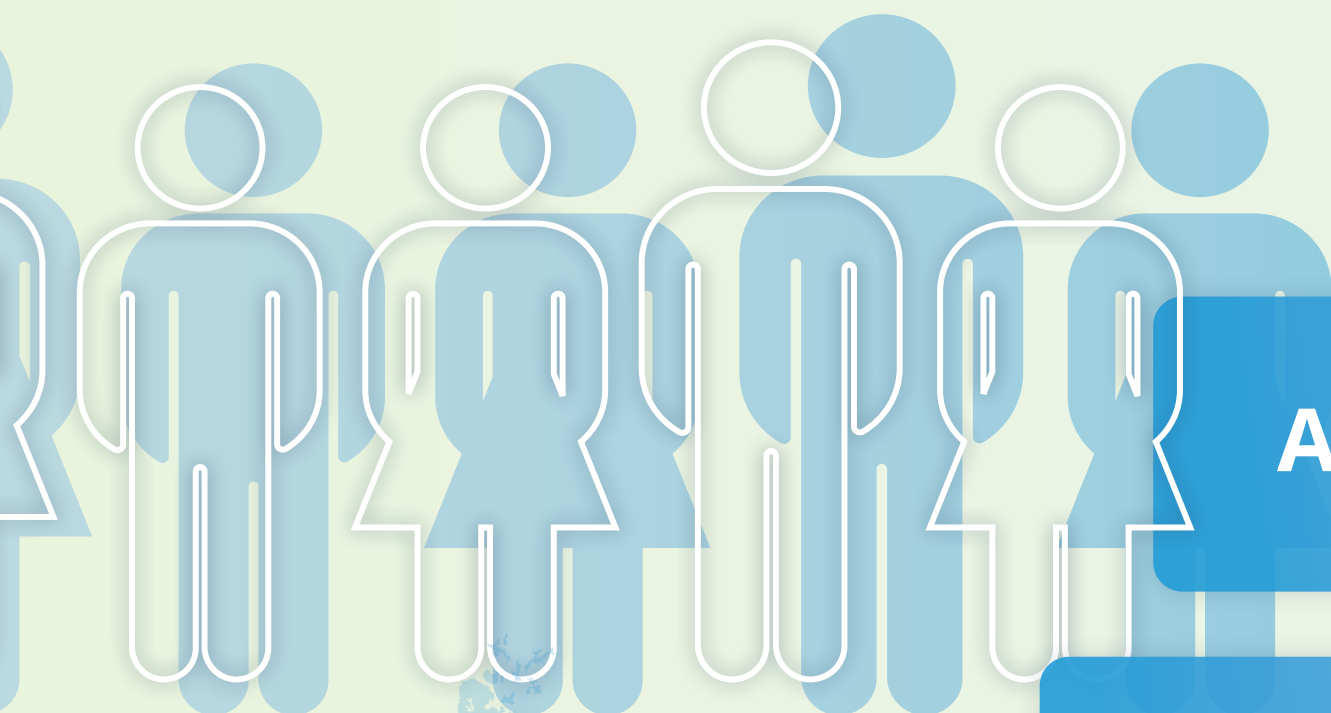

(we buy *here*...)

...so you **don't** pay *here*!)

Sustainable Solutions  
Why Choose a Sustainable Basket?

FEATURE	BENEFIT
Aggregated Buying Power	Lower Energy Cost
Renewable Energy Access	Reduce Carbon Footprint
End-to-End Service	Simple Energy Management
Nationwide Accessibility	Open to all Businesses
Customised Solutions	Tailored to Individual Needs

Sustainable Solutions  
Products at a glance

**FIXED**

Peace of mind

Provides the best protection against movements in non-commodity and wholesale energy prices

**Flex LITE**

Combine price certainty with flexibility

Fix volatile non-commodity costs

Fix a commodity billing rate on annual or contract basis

Spread commodity price risk over multiple purchasing decisions

**Flex CHOICE**

Managed flexibility

Hedge prices based on market movements

Non-commodity charges are pass-through with the option to fix certain elements

Ability to trade freely within a set volume tolerance banding

**Flex CASHOUT**

Full control of your energy purchasing

Ultimate purchasing flexibility. Hedge energy across all periods, for any amount

Freely trade prior to delivery. Any unhedged consumption is settled on a relevant Gas or Power index

Complete market access, allowing you to fully align energy purchasing with business requirements

# Eden Utilities Flexible Procurement

Eden Utilities provide flexible procurement services and trading solutions to help businesses **manage their energy contracts and mitigate risk.**

Our flexible procurement services allow you to take advantage of market fluctuations by **purchasing energy on the market dips** via a Risk Managed Strategy.

Our trading solutions provide you with access to our trading desk, advising of **optimum buying** by monitoring fundamental and political drivers.

## Our procurement services include:

- Contract Negotiation
- Energy Hedging
- Position Reports
- Market Trade Desk Calls

# Eden Utilities Trading Desk

Our trading desk has over 15 years' experience managing the energy portfolios of some of the **largest brands in the UK** and Europe, including sectors like Pharmaceutical, Banking, Retail & Manufacturing.

Expertly risk managed energy procurement, providing protection against unnecessary price upside, and reducing year on year price volatility.

We'll take care of everything; we constantly monitor energy markets and execute a hedging strategy for you based on your specific risk profile.

We incrementally hedge (and sell back) your volume based on the study of supply & demand fundamentals and price chart analysis that allows us to understand the underlying market sentiment.

You'll get cheaper energy & budget certainty and we'll keep you updated with regular market webinars.

# Eden Utilities

## Value added Service

Eden Utilities can also offer value added services to complement the procurement such as invoice validation, monthly forecasting and platform access.

### Invoice Validation

A detailed review of a business' energy bills to ensure that they are accurate. Our team will identify billing errors, and negotiate with energy suppliers to correct any errors and secure refunds for overcharges.

### Monthly Budget forecasting

Involves predicting energy costs for future periods. The report is fully delivered and includes a mixture of known and forecast pricing. The reports can be detailed down to site level.

### New Connection & Metering Services

Providing an end-to-end new connection service to support our clients with all new installations, ensuring all installations are completed efficiently. We review Meter Operator and Data Collector contracts to confirm they are competitive, and that data is being captured. Remotely collected data is imported into your bespoke dashboard, providing accurate cost and consumption reporting.
